

Title: Teachers Competences:
Modeling, measuring and enhancing basic competences of teachers

Aims and scope of the symposium:

Teachers have to possess various skills for managing the demanding tasks their profession implies. Being expert in their subjects, judging pupils school achievement, creating an adaptive class with individual tasks, counseling parents and pupils concerning learning difficulties are just some of the competences teachers require.

This symposium welcomes empirical papers which concern modeling, measuring or enhancing a specific competence which is important for successful teaching.

List of possible papers to include into the symposium:

Quantitative or qualitative studies concerning

- Adaptive teaching competence
- Educational and psychological competence of teachers
- Diagnostic competence of teachers
- Counseling competence of teachers
- Development of teachers competences

If you decide to submit a paper for this symposium we kindly ask you to send us title and abstract (up to 300 words) for your paper before October, 20th.
