

Foundation of an “EDUREV College of Reviewers” – Nomination of candidates by Special Interest Groups

The active participation of EARLI members in journal-related activities is a crucial component of the success of the EARLI journals. At the same time, researchers gain recognition if they participate in the activities of prestigious journals. With the foundation of an “EDUREV College of Reviewers”, a tool is introduced that increases the **relatedness of the EARLI community – in particular the SIGs – and EDUREV**. The SIGs get an opportunity to take part in the renewal of the journal’s Editorial Board by nominating promising future Board members.

In collaboration with the EARLI Executive Committee, in particular the Portfolio Holder for Publications, **EDUREV invites each EARLI SIG to nominate two potential future Board members**. The nominated researchers will become members of the College of Reviewers and will be listed on the journal website. They should be willing and will get opportunity to write a substantial number of reviews for EDUREV, at least three per year. The SIG coordinators should send the nominations to info@earli.org by **May 15th, 2022**. The nomination should include a short statement of grounds, the consent of the nominees and three to five keywords per nominee indicating the areas of expertise.

Members of the EDUREV College of Reviewers will be preferential candidates for future membership in the EDUREV Editorial Board.
